<mark>Enrolling in ISE 5000 level courses.</mark>

These are cross-listed courses, meaning we allow undergraduate and graduate students to enroll. You only have permission to add the undergraduate section. Schedule planner does not always recognize the difference so be sure you are enrolling in the correct undergraduate section.

If you attempt to add the graduate section, you will receive the following error message: "Permission to enroll in this class is required. The class falls outside of the career of study."
